

Webinar: Lithium Batteries and Subrogation

Date & Time

Start Date: 03/31/2016

Start Time:

11:30 a.m. – 12:30 p.m. ET

10:30 – 11:30 a.m. CT

9:30 – 10:30 a.m. MT

8:30 – 9:30 a.m. PT

Many products are powered by lithium batteries – laptops, iPhones, digital cameras, etc. Many of these products function without consequence; however, there are some products being put on the market that pose fire risks because they are not equipped with the necessary safeguards.

Philip J. Berens and **Jake P. Skaggs** will discuss:

- How and why lithium battery powered products fail
- How to coordinate your subrogation investigation into one of these product failures
- Product liability laws in the states of California, Arizona, Texas, Louisiana and Florida and why it is important to pay attention to state-specific laws when pursuing one of these claims

Hypothetical case studies will be used to demonstrate how an understanding of your state’s products liability laws are crucial to conducting a successful investigation and pursuing a worthwhile subrogation claim.

FL, PA, GA, NC, and TX approved for 1 CE credit. 1 CLE credit pending.
