

Grid Hurdles Can't Be Overlooked In US Offshore Wind Push

Monday, May 9, 2022

James Van Orden is quoted in a *Law360* article that discusses concerns regarding the long-term addition of offshore wind. Experts express that the US grid may not be prepared for what is to come and emphasizes the importance of taking action to accelerate transmission development as the number of turbines in the water continues to increase.

"Their work in this area could be a model approach for how offshore wind power generation can be accounted for in regional transmission planning going forward," said James.
